

Workshop Setup Guide

1. Make sure that you have Node installed, as this is required to run any React project. Please download it from this link:
<https://nodejs.dev/en/download/>
 - a. To check that you have installed it correctly, go to Terminal (Mac) or Powershell (Windows) and type 'npm --v' in order to verify that the latest version is installed.
2. Download the zip file from here:
<https://github.com/conrad-mo/wicsm-react-workshop/archive/refs/heads/master.zip>
3. Unzip the zip file to access your starter code.
4. In the Terminal (Mac) or Powershell (Windows), set the working directory to the folder than contains the starter code by using 'cd [your_folder_name]'
5. Run 'npm i' to install the project's dependencies.
6. Run 'npm start' to begin hosting your project.
7. Listen carefully, code, and watch as your application grows!
